

**Remarks**

**Claims 1-15 are currently pending in the application.**

**The drawings stand objected to in their failure to provide legends for elements 54, 56 and 49. In Applicant's copy of the drawings as submitted to the U.S. Patent Office, legends 54, 56 and 49 are present in the Figure 1 and, in the case of elements 54 and 56, also in Figure 2. Copies of the drawings as filed accompany this Response. Hence, no amendment has been made to the drawings.**

**The disclosure stands objected to for failing to describe element 42. Applicant respectfully refers the Examiner to page 7, lines 20 through 22 of the specification where a description of element 42, a lift arm represented schematically is presented.**

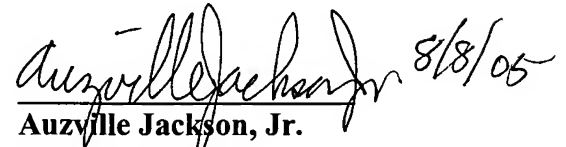

**Claim 7 stands objected to for failure to present proper antecedent basis for the term "the amount of load applied to the measurement arm". Applicant has accepted the Examiner's suggestion and, with the foregoing amendment to the claims, claim 7 now depends from claim 6 in lieu of claim 5.**

**The Examiner has graciously indicated the allowability of all of the claims once the foregoing objections have been met. All of the objections having been met,**

Docket 1656 (TA&T)

**Applicant respectfully submits that the application stands in condition for allowance  
and the same is respectfully requested at an early date.**

**Respectfully submitted,**

  
**Auzville Jackson, Jr.**
